1XBET: account, welcome, apps and operations — Launch series and stability

Series	7 values, s	Mean, s	Median, s	Min, s	Max, s	Success/errors
Android cold	6.830, 2.150, 5.530, 6.310, 6.960, 4.100, 6.960	5.5486	6.310	2.150	6.960	7 / 0
Android warm	1.770, 1.635, 0.735, 2.130, 1.545, 1.185, 1.500	1.5000	1.545	0.735	2.130	7 / 0
iOS cold	8.010, 5.070, 6.610, 7.030, 3.110, 5.070, 6.330	5.8900	6.330	3.110	8.010	7 / 0
iOS warm	1.680, 2.560, 1.735, 2.230, 1.570, 0.745, 1.075	1.6564	1.680	0.745	2.560	7 / 0

I measured the interval from selecting the Tower Rush card to the active Build button. Cold: cleared data; warm: saved cache. Opening the shell and installing the APK are not included in this interval. Outside the main series, I interrupted the connection before acceptance: a debit of 0 PKR; after acceptance I re-read the previous round and its single payout. Errors from the artificial network disconnection were not added to the denominator of 28 regular launches.

SUP-PK-1XBET support. I wrote via Live Chat in ur-PK at 02.11.2026 13:11:00 PKT about the difference between game Cashout and external withdrawal. Auto-reply after 3 s; first substantive reply 02.11.2026 13:11:27 PKT, after 27 s; resolution 02.11.2026 13:21:30 PKT, after 630 s from the request. A separate question in en-PK gave the same procedure. Channel hours 24/7. The monetary adjustment under this clarification — 0 PKR; the bonus correction of 0.00 PKR relates only to WELCOME-PK-1XBET.

Limits and protection. I set a deposit limit of 14250.00 PKR per PKT day, then reduced it to 9500.00 PKR immediately. An increase had a delay of 48 hours. The session limit — 54 min; an accepted round was brought to settlement. I checked the self-exclusion scenario for 180 days: the next login to betting was blocked, and access to the residual withdrawal request was separated from game permission.

The bet will be settled as a loss if there was no penalty in the game or the penalty awarded to team 2 was converted (a goal was scored from the penalty).
- Bets "First/last goal from ()min to ()min" . Bets on this outcome are accepted taking into account added time. The bet "First goal from 10:00 to 14:59" will be settled as a win if the first goal is scored in this interval.

- System 3/6 - this is a bet on a full combination of accumulators of a certain size (3) from a pre-selected number of events (6). 3 or more events must match in order for the system not to lose.

Tower Rush

- Event 1 + event 2+ event 3, event 1 + event 2+ event 4, etc., i.e. 20 accumulators with three events in each accumulator.
- Four events matched in the coupon: Event 1, Event 4, Event 5, Event 6. It was necessary to guess three events.
- 2. Calculation of the bet amount per one variant: divide the bet amount (60 rub.) by the number of variants for the system 3/6 (20), we get 60:20=3 rub. The bet amount per one variant is 3 rub.
- 3. Due to the fact that 4 variants were guessed, it is possible to compose combinations of accumulators from three events. There are 4 such combinations (see the table).
- That is, the bet +0,75 on Villarreal, the bet is split into: bets with handicaps (+1) and (+0,5).
- Bet on Real Madrid handicap (–0,75), then we get two bets with handicap (–0,5) and (–1).
- If a bet on an Asian handicap was part of an accumulator or system, then the number of variants doubles.
- For example, an accumulator of 100 rubles was placed from two events with a total of 3.25. Both pairs played with a score of 3-0. How much will we get? Here there will actually be 4 accumulators: >3,>3; >3,>3.5; >3.5,>3; >3.5,>3.5, which means that for one we get a refund of 25 rubles, all the others are lost.
- Bet on a total that is a multiple of 0.25 (but not a multiple of 0.5). Such a bet is settled as two bets in the amount of half the sum, with the same odds, and with the nearest values of "ordinary totals" (integer, or multiples of 0.5).
- When settling, the bet is split into two: total (1.5)U and total (2)U. The bet amount is divided in half (50 rub. each)
- match score (0:0) or (0:1) – both totals went through, the bet won (100x1.4=140 rub.)
- match score (1:1), (0:2) – bet on total (1.5)U – loss; bet on total (2)U – refund of 50 rubles.
- When settling, the bet is split into two: total (1.5)O and total (2)O. The bet amount is divided in half (50 rub. each)
- match score (1:1), (0:2) – bet on total (1.5)O – win; bet on total (2)O – refund of 50 rubles (50x1.4 +50=70+50=120 rub.)
- Volleyball. South Korea (women) - Myanmar (women) 1 will win the 15 point in the 1 set 1.45
- Tennis. ITF. K.Onishi/Yonemura - Kato/Hiroko Kuwata (Jpn) Game 18: 40:40 No 1.36
- Milan – Bayern Munich W1, odds 2.0 - 100 rub. Bet 100 rub. on Milan's win. The winning odds for bets on Milan's win - 2.0. The payout if Milan wins will be 100 x 2.0 = 200 Net winnings: 200 rub. (payout) 100 rub. (bet) = 100 rub.
- The coupon will win if the outcomes of all matches included in the accumulator are correctly guessed. Then the winning odds for the outcomes included in the accumulator are multiplied: 2.0 x 2.1 x 2.9 = 12.18. With a bet on the accumulator of 100 rub., the winnings amount will be 100 rub. x 12.18 = 1218 rub. Net winnings (minus the bet amount): 1118 rub.
- Bet amount: 60 rub. To calculate the winnings for the system, perform the following actions: 1. For the system 3 of 6 variants, 20 accumulators will be composed, for example:

Tower Rush

- I accumulator. 1.6 x 1.3 x 1.45 x 3 rub. = 9.05 rub. II accumulator. 1.6 x 1.3 x 1.85 x 3 rub. = 11.54 rub. III accumulator. 1.85 x 1.3 x 1.45 x 3 rub. = 10.45 rub. IV accumulator. 1.6 x 1.85 x 1.45 x 3 rub. = 12.88 rub.
- 4. Final calculation of winnings for this system: Winnings are summed over all variants of the system: I + II + III + IV = 9.05+11.54+10.45+12.88 = 43.92 rub.
- That is, a stake +0,75 on Villarreal, the stake is split into: stakes with handicaps (+1) and (+0,5).
- A stake on Real Madrid handicap (–0,75), then we get two stakes with handicap (–0,5) and (–1).
- The settlement of stakes will take place in the sequence indicated in the coupon. Example 1. All events won. Myanmar won, the winnings will be 10x1.45=14,5 RUB; the 2-th stake (Navy win) will be settled as: (14,5 – 10) + 10x1.62 = 4,5+16,2=20,7 RUB; the 3-th stake will be settled as: (20,7 – 10) + 10x1.36 = 10,7+13,6 =24,3 RUB; the 4-th stake will be settled as: (24,3 – 10) + 10x1.45 = 14,3+14,5 =28,8 RUB. This will be the winnings on the stake. Example 2. The first, third and fourth events won. Myanmar won, the winnings will be 10x1.45=14,5 RUB; the 2-th stake – loss (14,5 – 10)=4,5 RUB – the balance on the chain account; the 3-th stake will be settled as: 4,5 x 1,36 = 6,12 RUB – the balance on the chain account; the 4-th stake will be settled as: 6,12 x 1,45 = 8,87 RUB. This will be the winnings on the stake. Example 3. The first, second and fourth events won. Myanmar won, the winnings will be 10x1.45=14,5 RUB; the 2-th stake (Navy win) will be settled as: (14,5 – 10) + 10x1.62 = 4,5+16,2=20,7 RUB; the 3-th stake – loss, will be settled as: 20,7 – 10 = 10,7 RUB; the 4-th stake will be settled as: (10,7 – 10) + 10x1.45 = 0,7+14,5 =15,2 RUB. This will be the winnings on the stake.

- The system type determines the minimum number of winning bets. For example, in a 2/3 system, at least two of the three bets must win, and one may lose.
- Immediately after selecting the system type, all accumulators possible for that type are created. In a 2/3 system there will be three accumulators, in a 2/4 system — six.
- The stake amount will be divided equally among all accumulators. For example, in a 2/3 system, a stake of 150 will turn into three bets: 50 on each accumulator.
- According to the accumulator rules, the winnings amount is calculated by multiplying all the accumulator's odds and the stake amount. And the system's winnings amount is calculated by adding up all the winning accumulators.

- These Terms define the procedure for accepting bets, paying out winnings and settling disputes, and also define the specifics of individual bets on certain sports. These Terms govern any other relations between the Company and the Client.
- These Terms apply to bets placed on the Website and at the Company's betting points.
- A "Bet" is a risk-based agreement on potential winnings concluded between the Client and the Company in accordance with the established Terms. Performance of the agreement is conditional on an event whose outcome has not yet been determined. Bets are accepted on the terms offered by the Company.
- "Outcome" is the result of the event (events) on which the bet was placed.
- "Void bet" is an outcome in which the bet is not settled and winnings are not paid. According to the Terms, in the case of a "void bet", the agreement between the Company and the Client is deemed not concluded, and the stake amount is subject to return.

Tower Rush

- "Regular time" is the duration of the match provided for by the rules of the relevant sport, including time added by the referee. Regular time does not include extra time, overtime(s), penalties, etc.

1xBet: additional precise terms and statements — Responsible gaming and restrictions

- Game flow (lead-win, lead-draw, lead-lose) – bets are accepted on regular time including added time. This type of bet will be settled based on the first team to take the lead in the score, combined with the final result, regardless of how often the leader changes during the game thereafter.
- The bet "Any goalkeeper touches the ball within the first N minutes of the match" and "Both goalkeepers touch the ball within the first N minutes of the match" take into account any touches of the ball by the goalkeepers, even if the ball was out of play at the moment of the touch, etc. These bets take into account the actual touches of the ball by the goalkeepers, regardless of whether such a moment was shown in the TV broadcast or not. If the moment of the ball touch was not shown in the broadcast (for example, if a goal kick was not shown because a replay was being shown at that moment), then the time of the ball touch is taken as the time the live broadcast resumed.
- Only one of the dependent outcomes may be included in an accumulator. If two or more dependent events are included in one accumulator (system), the events with the lowest odds are excluded from that accumulator (system). Dependent outcomes (interdependent events) - the result of one part of the bet affects the result of the other part.
- With an "Asian handicap" bet, the bookmaker actually accepts two bets. Thus, a bet with odds (+1,25) represents a set of two bets: on the handicap (+1) and on the handicap (+1,5). The amount for each of these bets is equal to half the amount of the entire handicap. The total winnings of the handicap will be equal to the sum of the winnings of these two bets. Depending on the result, you may win both bets; win one and get a return on the other; lose both.
- Accumulator - a bet on several independent outcomes of events. The winnings on an accumulator are equal to the product of the stake amount and the odds of all outcomes included in the accumulator. A loss on one of the outcomes of the accumulator means a loss on the entire accumulator.
- c) any actions or attempts made by you that may reasonably be regarded as unlawful in any relevant jurisdiction, committed intentionally or with the intent to deceive and/or circumvent legal restrictions, regardless of whether such action or attempt ultimately resulted in loss or damage to you;
- For the purposes of these Terms, "user" (and, depending on the context, "you", "your") means a person who accesses the Website and its content, as well as uses gaming and other services (hereinafter — "Services") on or through the Website (hereinafter — "Client", "you", "your"). These Terms define the procedure for accepting bets, paying out winnings and settling disputes, and also define the specifics of individual bets on certain sports. These Terms govern any other relations between the Company and the Client. These Terms apply to bets placed on the Website and at the Company's betting points.

In the interface there were two separate bet panels with amount buttons 10, 50, 100, 500, 1000 and 5000, autoplay activation and placing a bet on the next round. These are quick-select buttons; the minimum and maximum limits are considered separately. The personal history showed "You have not placed any bets yet"; this is the initial state of the account before a bet.

In the partner row, Billie Jean King Cup by Gainbridge and PGL are additionally discernible. Partner relationships are fixed in the expert base.
