Mechanics and configuration passport

I analyzed the original individual cycle: bet → Build → server acceptance → floor result → Cashout or the next Build. One initial bet was debited once. There is no common flight and no second panel. Reels, wild/scatter, lines, slot FS, jackpot, feature buy, Autoplay and Auto Cashout are absent in the profile under consideration. Tower Rush 2 and Tower Rush Branded are other products; the figure 2 in the editorial domain does not change the object of the review.

Frozen Floor protects the locked amount; upon a successful continuation it is included in the final gross and is not credited a second time. After Frozen, no new bonus floors appear; a subsequent successful floor has a multiplier of no less than 1,5×. Temple multiplies the current amount by the wheel result; the ten sectors of the original mechanic: 1,5×, 1,5×, 2×, 2×, 3×, 3×, 5×, 5×, 7×, Frozen. The number of identical sectors does not by itself establish probability. Triple Build adds three floors without three monetary debits.

Game identity and description: Galaxsys — Tower Rush. RTP 97% below is the approved game configuration; the return of the short log is calculated independently. The win amount cap does not turn into a universal multiplier cap.

Configuration	Mode	RTP	Bet	Step	Gross cap
TR-PK-97	PKR	97%	27.00 PKR–36000.00 PKR	0,50 PKR	3150000.00 PKR / round
TR-PK-DEMO	FUN	97% in the approved profile	1–100 FUN	0,50 FUN	10 000 FUN / round

For a fixed turnover of 35000.00 PKR, the expected gross at 97% = 33950.00 PKR; expected net = −1050.00 PKR. With alternative 96,2%, losses are 1330.00 PKR; the difference in losses is 280.00 PKR, or 21,0526% relative to the second configuration. Mathematical RTP is a configuration parameter; the return of a short session is accounted for as a separate indicator.

Game comparisons: studio and external analogues

Each row below is a separate comparison configuration for Pakistan, PKR, November 2026. Numerical limits, RTP of alternative profiles and results are approved parameters of the respective configurations and provider specifications. Seven games from the same studio and seven external analogues are retained by identity; the results of their episodes are fixed in the expert base. Each has a separate FUN demo and money scenario, with no balance transfers between modes.

Subject reference: parameters and applicability

Each row contains a separate attribute of the game profile. Repeated operations, apps, languages and methods are detailed in the cards above. The non-applicability of a slot field means that this mechanic is absent in the original Tower Rush. All values are confirmed data of the corresponding game and operator profiles.
