ID	Attribute	Value, conditions and result
18-01	Exact name search	Catalog → search Tower Rush → Galaxsys → Original.
18-02	Partial name search	The query Tower also showed Tower Rush 2; I distinguished the suffix before launching.
18-03	Provider filter	The Galaxsys filter left the studio's games, not all games with a tower on the cover.

ID	Attribute	Value, conditions and result
18-04	Genre filter	Fast/Crash/Tower — operator rubrics; the mechanic is defined by the rules.
18-05	Combining filters	Name plus Galaxsys; I verified the version suffix separately.
18-06	Filter reset	After resetting the filter I returned to the general results, the selected account was preserved.
18-07	Favorites	I added the original to favorites and reopened it; the sequel did not replace the entry.
18-08	Recently opened	After launching, the original appeared in the recently opened history; this is not the history of real-money bets.
18-09	New games	The New label relates to the catalog card; the release date is not calculated from it.
18-10	Order of results	Exact match first, then other titles; the position ranking is not an RTP estimate.
18-11	Loading the next page	I loaded the next page and excluded duplicates of the exact game key.
18-12	Number of actions	3 actions from search to mode selection.
18-13	Task completion time	10.80 s from entering the query to selecting the required card; separate from game loading.
