Subject reference: parameters and applicability — 30. Comparisons

ID	Attribute	Value, conditions and result
30-01	Competitor name	1Win, Stake, MyStake, 1XBET, 4RABET, Melbet, Parimatch, Crorebet, Betify, Betclic.
30-02	Reason for inclusion	Operators are alternative access routes; games are crash/instant with a decision to continue/exit, while differences are preserved.

ID	Attribute	Value, conditions and result
30-03	Product specialisation	Tower Rush — an individual stack; analogues have their own flight/instant mechanics.
30-04	Market and version	Pakistan; November 2026; original Tower Rush.
30-05	Operator	Game developer and access operator are separate columns.
30-06	Licensing scope	The matrix is not confirmation of a valid operator licence.
30-07	Game formats	Tower/flight crash/instant; this table contains no sports markets and no live dealers.
30-08	Named games or line-up	Tower Rush and fourteen separate comparison cards with developer and parameters.
30-09	Number of games	15 exact game products; 10 operator profiles.
30-10	Providers	Galaxsys and seven external studios; third-party products are not included in the number of games Galaxsys.
30-11	Demo	The demo of each card is a separate FUN mode; monetary results are not carried over into it.
30-12	Android	10 detailed Android APK profiles.
30-13	iOS	10 detailed iOS WebView profiles.
30-14	Desktop	Chrome / Windows ENV-D.
30-15	Exact payment operation	DEP-PK/WD-PK for each brand; individual amounts and methods.
30-16	Payment country	Pakistan.
30-17	Minimum	Minimums are given separately for cashier, bet and bonus qualification.
30-18	Fee	Received = W−fee; percentage or fixed charge per specific card.
30-19	Processing time	review and transit are separate, the total is calculated.

ID	Attribute	Value, conditions and result
30-20	Welcome	Each operator has its own offer; the original Slots/Aviator/FS are not named Tower Rush welcome.
30-21	Wagering	Individual multiplier and base; MyStake 30×(D+B), not 30×B.
30-22	Contribution of the selected game	0% Tower Rush in the selected welcome; T-PK-01 — a separate approved tournament profile.
30-23	Cashback	CB-PK-01: surcharge 647.25 PKR.
30-24	Support	A separate SUP episode for each of the 10 brands.
30-26	Distinctive feature	Different methods, fees, KYC, welcome accruals and app measurements; comparison within a single PKR domain.
30-27	Limitation	The matrix compares specific routes; it does not by itself select a universally best operator.
30-28	Rating methodology ID and version	TR-PK-RATING-1 separately from OP-PK-RATING-1.
30-29	Rating category criterion	Game: clarity of rules, control, modes, resilience, verifiability of calculation.
30-30	Nominal category weight	Game weights: 30%, 20%, 15%, 20%, 15%; operator weights: payments 25%, bonuses 20%, games 20%, mobile 15%, support 10%, transparency 10%.
30-31	Category coverage	Across 5/5 defined game criteria; operator criteria are disclosed in each profile.
30-32	Effective category weight	With full coverage the effective weight equals the nominal weight; an excluded feature does not receive a random mask.
30-33	Rule for including a rating value	Approved measured criteria are included in the calculation; effective weights are normalised across the included criteria, and a zero score corresponds to a measured result.

ID	Attribute	Value, conditions and result
30-34	Rating threshold and rounding	0–10, components in steps of 0,1; the total is half-up to 2 decimal places; an assessment of convenience, not of profit.
30-35	Final rating score	Game 7.31/10; operators: 1Win 7.95, Stake 7.12, MyStake 7.79, 1XBET 7.56, 4RABET 6.59, Melbet 6.96, Parimatch 6.25, Crorebet 6.50, Betify 6.85, Betclic 6.73.

Subject reference: parameters and applicability — GR22. In-game applicability

ID	Attribute	Value, conditions and result
GR22-01	Type of objects of comparison or evaluation	Games, RTP configurations and access operators are compared separately; three different objects of evaluation.
GR22-03	Signs of mechanical similarity	Tower Rush — step-by-step individual risk; flight crash — common flight/acceptance window; the similarity consists in choosing to continue/exit, not in an identical RNG.
GR22-06	Same base of the calculation example	Same fixed turnover 35000.00 PKR; comparable ENV and cache for speed.
GR22-07	Difference in expected losses	At 97% losses 1050.00 PKR; at 96,2% 1330.00 PKR; difference -280.00 PKR.
GR22-08	RTP difference in percentage points	0,8 percentage points; the reduction in losses relative to 3,8% is 21,0526%.
GR22-09	Composition of the list and aliases	Tower Rush, Maestro, Cash Show, Starlight, Crasher, Rocketon, Chicken Crash, Limbo Crash, Pilot, Spaceman, Aero, JetX, Aviator, Skyward, Astronaut. Aliases do not double the number of games.
GR22-10	Number of unique participants	15 game products; 10 operators — a different entity.
GR22-11	Number of common participants	Set Galaxsys: 8 games; external analogues: 7; intersection 0.

ID	Attribute	Value, conditions and result
GR22-12	Similarity metric of the lists	Jaccard(studio, external)=0/15=0; this is similarity of composition, not of game quality.
